

The logo for fabricaide features the word "fabricaide" in a white, lowercase, sans-serif font. The letters "i" and "d" are stylized with vertical bars of varying heights and colors (blue, green, yellow, red) extending from their top and bottom respectively.

We utilize the only EPA registered and approved antimicrobial agent that can be applied directly in the wash cycle, ensuring every inch of your curtain is disinfected and stays bacteria free for at least 90 days. It is clinically proven to fight the growth of bacteria, fungi and mold. It also prevents odors, staining and deterioration of the fabric, increasing the life of the curtain, saving you money!

**“A spot on your curtain is a spot on your reputation”**

## STAIN REMOVAL

We are the only company that utilizes an aggressive stain removal system called “spotting.” In this process, we examine every inch of the fabric for stains. Each stain is then treated with the specific cleaning agent needed for the removal of that type of stain. Concurrently, each stain is physically removed from the fabric before the curtain reaches the washing machine.

## ON SITE CLEANING SERVICE

- Complete a full survey to determine the specific needs of your facility.
- Check in with the appropriate staff in charge of the unit designated for service.
- Our team of fully trained and vaccinated staff follow all precautions before entering the patients’ room.
- We remove soiled curtains and hang temporary sanitized curtains.
- Return to our facility, spot-treat each stain, wash and disinfect all curtains according to CDC guidelines.
- Apply EPA registered antimicrobial agent to keep curtains bacteria free for at least 90 days.
- Return to your facility and re-hang your spot free curtains.

### Cubicle Track Installation and Repairs

Our experienced installers will survey your facility and customize the installation to ensure maximum functionality of your privacy curtains.

### Cubicle and Drapery Manufacturing

We offer a full selection of styles and fabrics.

## Why choose On Site Drapery Cleaning, Inc.?

The difference is in the results. The majority of our customers have stayed loyal to us for many years. Why do they stay, because no one else offers our level of personalized service. The service we provide and procedures we utilize are unmatched by anyone in the industry. Our dual-threat cleaning process of spot removal of stains, followed by the treatment of the fabric with the only EPA registered and approved agent on the market that can be added directly to the wash cycle, ensures your curtains are returned 99.9% stain and bacteria free.

“Disinfectant/detergent formulations registered by EPA are used for environmental surface cleaning, but the actual physical removal of microorganisms and soil by wiping or scrubbing is probably as important, if not more so, than any antimicrobial effect of the cleaning agent used.” - Guidelines for Environmental Infection Control in Health-Care Facilities, recommended by CDC and HICPAC. (Healthcare Infection Control Practices Advisory Committee) 2003.

## PRODUCTS

We feature a multitude of new products including: roller shades, mini blinds, vertical blinds, custom valances, cornice boards, pillows, comforters & more!

## FACILITY

Our private facility features highly efficient machines that allow us to service hundreds of curtains in a day. Our dryers feature steam injection and alternating rotation cycles to help eliminate wrinkles in the fabric.
